

EvoFin is a specialized asset finance services provider for approved dealers and their valued commercial clients.

EvoFin enables dealers an opportunity to offer their clients an additional method of payment by paying a monthly rental for equipment.

Through EvoFin, clients will have immediate access to 9 funding facilities which includes several innovative methods of gaining and enhancing clients chances of credit approvals.

EvoFin offers a range of flexible financial solutions to help your company optimise its business management and growth potential:

- Enhance access to working capital.
- Support business expansion and investment
 - We can assist in freeing up working capital, improving cash forecasting and budgeting and maximising tax advantages.
- Streamline fixed and moveable asset acquisition
- We make it our business to create successful partnerships with our customers by:
 - Identifying and understanding their current and future business needs.
 - Developing customised solutions to suit their specific business requirement

EvoFin requires the following documentation:

- Completed and signed credit application
- Dealers quotation
- Latest 3 months bank stamped statements
- Latest management accounts
- Latest set of audited financial statements

By leasing your equipment through EvoFin, you will be entitled to the following benefits:

- Cash flow benefit and preservation. Smoothed cash flow helps with affordability as no lump sum payment and no deposit means that you are able to use your cash in your core business or invest in appreciating assets.
- Off balance sheet as lease payments are listed as operating expenses (OPEX) and therefore, no liabilities are reflected on your balance sheet.
- Removing the hassle factor as EvoFin will do all the necessary running around to facilitate credit approvals.
- No impact on your existing credit facilities as EvoFin is able to source funding from alternative funders.
- VAT is payable and claimed monthly.
- All lease payments are tax deductible.
- Lease periods can be aligned to warranty periods.
- Upgrades driven by technology are easy, ensuring obsolescence risk is minimized.
